There are no limits to your creativity. The schedule function allows you the ability to schedule your slides, you can set start and stop times for it.

## E) Show all Playlists - [top](#)

Here can you see all your playlists, edit or delete them.

Playlistname	Slides	Showing	Format	Slidenames	Last Change	Valid From	Valid To	Edit	Delete
Signage Playlist	1	✓	Landscape		2016-09-28 12:11			<a href="#">✎</a>	<a href="#">🗑️</a>
test	1	✓	Landscape		2016-09-29 12:25			<a href="#">✎</a>	<a href="#">🗑️</a>

## F) Add new output Device - [top](#)

Create new device or choose one from the list. Click on device settings button to edit it or to see device details and url for the output.

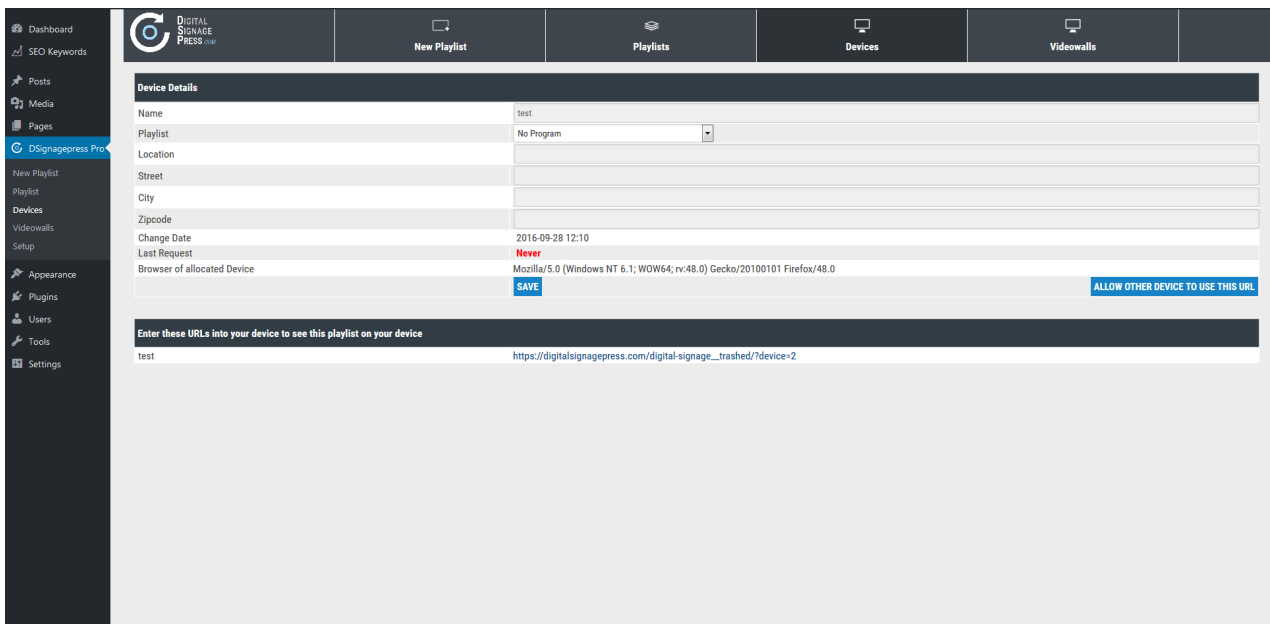

FILTER BY: Everything  (use \* as wildcard) VIEW: All Items

[ADD NEW DEVICE](#) PAGE: 1

Device Name	Playlist	Change Date	Last Request
(nameless device)	N/A	2016-07-25 15:16	Never
test	N/A	2016-09-28 12:10	Never

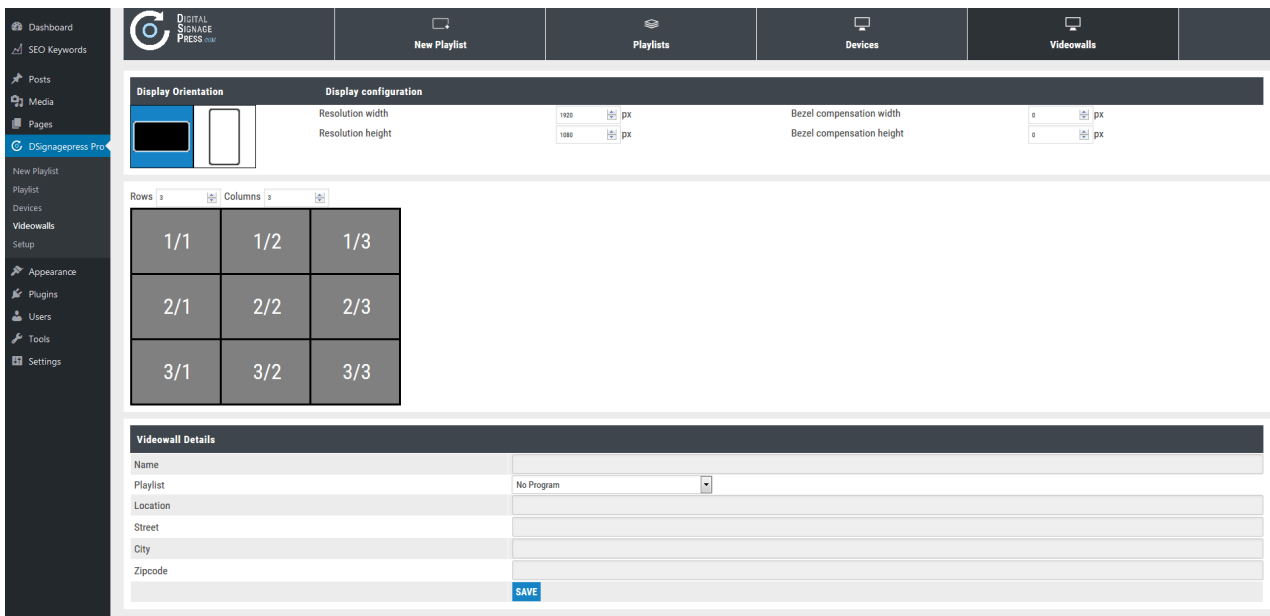

## G) Device settings - [top](#)

Choose a playlist and enter the output URLs into your device to see this playlist on your advertising screen. You can allow other devices to use this url too.

## H) Videowalls - [top](#)

Create a new Videowall from multiple screens. Choose display orientation and resolution, add rows and columns of your screens for the output.

A video wall is a special multi-monitor setup that consists of multiple computer monitors, video projectors, or television sets tiled together contiguously or overlapped in order to form one large screen. Typical display technologies include LCD panels, Direct View LED arrays, blended projection screens, Laser Phosphor Displays, and rear projection cubes. Screens specifically designed for use in video walls usually have narrow bezels in order to minimize the gap between active display areas, and are built with long-term serviceability in mind. Such screens often contain the hardware necessary to stack similar screens together, along with connections to daisy chain power, video, and command signals between screens. A command signal may, for example, power all screens in the video wall on or off, or calibrate the brightness of a single screen after bulb replacement. Reasons for using a video wall instead of a single large screen can include the ability to customize tile layouts, greater screen area per unit cost, and greater pixel density per unit cost, due to the economics of manufacturing single screens which are unusual in shape, size, or resolution.

## I) Frequently Asked Questions - [top](#)

### What do I need to use Digitalsignagepress?

You need a WordPress installation and your devices.

### Can I use shortcodes of other plugins?

Theoretically yes, we do parse the shortcodes on the device sites. But we can not guarantee that all will work.

### How do I edit a previously created slideshow?

Select the slideshow and choose in a dropdown menu slideshow again.

### Which languages are supported?

Currently only english and german are supported.

### How are the device links generated?

You will get one link for each WordPress page that has our shortcode in it. During activation of our plugin one signage page is generated with the shortcode so you can start right away.

### How do I change file upload limit?

Edit **POST\_MAX\_SIZE** and **UPLOAD\_MAX\_FILESIZE** in your **php.ini** and for Multisite installation additionally go to Network Admin - > Network Settings and change Max upload file size.

### Which media formats are supported?

Following MIME-Types are supported: JPG, JPEG, PNG, BMP, GI, MP4, MPEG, MPG, OGG, WEBM. For more informations look at MDN

### When I choose 4 horizontal monitors when I do on screen, is it to big?

You have the option to enter the correct width and height information of your displays when you create a videowall in the "Videowall"-tab. Please gather the resolution height and width from the manufacturer information.

---

## J) Plugin Error Messages - [top](#)

Digitalsignagepress Pro plugin will simply show an error message in your admin area or stop the plugin functioning in the way it should.

### Known error messages:

- **Parse error: syntax error, unexpected ')', expecting :: (T\_PAAMAYIM\_NEKUDOTAYIM)** - You need PHP version 5.5 or higher! Please contact your website host or server administrator for more information.
- 

## K) Notes - [top](#)

1. Please deactivate all page caching systems on pages with the shortcode from our plugin.
  2. It is generally not advised to activate plugins network wide on a multisite installation, because plugin activation routines are not executed for new subsites by WordPress making certain plugins unusable.
- 

## L) Requirements - [top](#)

### Requirements for perfect Digital Signage with Digitalsignagepress Pro:

- WordPress Version 4.4 or higher
- PHP 5.5.x or higher
- JavaScript enabled browser for devices

Once again, thank you so much for purchasing this plugin. We would be glad to help you if you have any questions relating to this plugin. No guarantees, but we'll do our best to assist. If you have a more general question relating to the plugins on CodeCanyon, you might consider visiting the forums and asking your question in the "Item Discussion" section.
