

# LG WebOS screen installation

## Configuration

1. Hold down the Settings button on the remote control for a few seconds.  
After a few seconds, a box will appear in the upper right corner.  
Enter the numbers 8080 and then press OK.
2. Insert the link and select „REMOTE“

The screenshot shows a configuration screen for a server. At the top, the word "SERVER" is displayed in large, bold, grey letters. Below this, there is a horizontal line. The configuration options are as follows:

- SI Server IP**: A text input field.
- Port Number(0~65535)**: A text input field.
- Secure Connection**: A dropdown menu currently set to "Off".
- Application Launch Mode**: A dropdown menu currently set to "Local".
- Fully Qualified Domain Name**: A dropdown menu currently set to "On".
- A red rounded rectangle contains the URL: <http://digitalsignagepress.com/digital-signage/?device=1>
- Local Application Upgrade**: Two buttons, "USB" (white) and "REMOTE" (red).
- USB Application Upgrade**: One button, "REMOTE" (white).
